ABOUT US

Co-Draft is an academy designed to enable Lawyers, Law students, and Professionals from the Corporate sector to draft precise and Comprehensive legal documents.

For the first time in India, in 2017 Co-Draft Academy of Law started to impart legal drafting and other allied skills to enable young lawyers and law students to start legal practice efficiently and independently.

Their pedagogy is interactive and absolutely based to build practical knowledge required to practise.

Today's law graduates are required to find their own ways to bridge this between theoretical and academic knowledge and its implementation in real world scenarios.

Many students join the office of a senior lawyer or a law firm, in the hope that on-the-job training will make up for the gap in their knowledge and experience. This may not be the most efficient way to acquire the requisite skills and knowledge since its time consuming.

It is to address precisely this void between learning and practise that CO-DRAFT came into existence.
